THE TRIBUNE.

Metrenchment and Reform.

Among the many excellent acts passed by Congress at its recent Session, designed and calculated to reduce the Expenditures of the Government and prevent such favoritism, jobbing and partisar spoliation of the Treasury as have hitherto been committed in behalf of Editors and other cherished partisans of the Executive for the time being in the guise of fat contracts to furnish Stationery, Printing, Mail-bags, &c. &c. for the Public Service, we find one on The Contingent Expenses of the Government, which comes directly to the point. The subject was taken hold of in the several General Appropriation bills and some progress made, but it was found too vast and complicated to be thoroughly treated there. Much was effected then, as in the Congressional Retrenchment hill, but much also left to be secured in a separate bill, which finally passed last week, and is now a law. This bill, beside making specific and careful approprietions for the Contingent Expenses of the several Departments of the Government, enacts the following salutary general previsions:

SEC. 9. And be it further enacted. That the President of the United States shall not allow to any minister resident a greater sum than at the rate of six thousand dollars per annum, as a compensation for all his personal services and expenses: Provided, That it shall be lawful for the President penses: 2 rounded, That it shall be lawful for the President to allow to such minister resident, on going from the United Statesteany foreign country, an outfit, which shall in ne case exceed one year's full salary of such minister resi-

Sec. il. And be it further enacted. That it shall be the duty of the Secretaries of State, of the Treasury, War and Navy, of the tome sistoners of the Navy, of the Postmaster General, of the Secretary of the Senate, and of the Cierk of the House of Representatives, to report to Congress at the beginning of each year the names of the clerks and other persons that have been employed, respectively, during the presons that have been employed, respectively, during the preceding year, or any part thereof, in their respective departments and offices, logether with the time that each clerk or
other person was actually employed, and the sums paid to
each; and, also, who ther they have been usefully employed;
whether the services of any of them can be dispensed with
without detriment to the public service, and whether the
removal of any individuals, and the appointment of others
in their stead, is required for the better despatch of business; and no greater allowance shall be made to any such
clerk or other person, that is, or may be authorized by law,
except to watchmen and messengers, for any labor or services required of them beyond the particular duties of their
respective stations, rendered at such times as does not interfere with the performance of their regular duties.

MUTINY .- We learn from the Salem Mercury of this morning, that the ship Sumatra, from Saem, arrived at Batavia, May 3d. A letter from the Captain states that on the 21st of April, off Java head, he saw a vessel in distress, ran down, and discovered it to be the British bark Kilmers. of Glascow, and to his astonishment, the only person he saw was a female, who appeared frantic with despair. The captain sent a boat and took her on board the Sumatra.

She was a young lady, eighteen years of age the wife of Capt. Smith of the Barque-she stated that the Kilmers left Batavia two months previous, for Europe; that soon after leaving, the crew mutinied, and came near killing the Captain (her husband) and herself-but the Captain finally succeeded in securing them below in different parts of the ship-and endeavored with only two boys to assist him, to work the ship back to Batavia, and on the morning previous to her meeting materare derived, and the calculations upon which they them, she missed her husband and the boys. She thought that a part of the crew in the night had water that they were instantly drawn under and freed themselves, and thrown the Captain and the boys overboard, and taken the boat and pulled for

> the land. In 20 minutes after she got on board the "Sumatra," I perceived, by the aid of my glass, the men crawling from the hatches and liberating each ther; they then ran aft, and put her "helm hard up," and her head sails filled-I immediately 'filled away" the "Sumatra" and gathering head way very quickly enabled us to avoid them. They tacked several times after us-the next morning she was 15 miles to leeward. The Dutch Government took care of the lady, as there is no English Consul here.

But let us introduce our reader more particularly to this new preparation, which has already been announced to the public under the name of SANDS'S SAR-SAPARILLA.

Nothing has more powerfully This medicine is the result of years of devotion to laborious chemical experiments in testing various modes of preparation, enabling them to concentrate in the most efficient form all the medicinal value of the true Sarsaparilla; and appreciate. The city has for the last year been they have at last accomplished this most desirable result by means of an entirely new, ingenious and costly apparatus. The process throughout is governed by strictly chemical laws, so that the essential principles, or the principles on which the restorative virtues of the Sarsaparilla depends, are entirely preserved. This is then combined with other artilected and deemed unworthy a thought, but those cles, selected wholly from the vegetable kingdom, all of of the State suffer equally. Bridges are left in a which are the most powerful purifiers of the blood, which half-finished state, without the necessary covering are then concentrated into a fluid extract that has been found by experience to possess the important power of immediately arresting the progress of disease and restoring the patient to perfect health. Therefore, those suffering from disease arising from an impure state of the blood or habit of the system. such as obstigate cutaneous eruptions, rheumatism, chronic sore eyes, or diseases arising from an injudicious use of mercury, or imprudences in life, have only to use this preparation, which has all combined that can be useful in the removal of their complaints. Combined with the other advantages which the preparation possesses, the proprietor has reaped the experience of a scientific gentleman who resided many years in that country which produces the best, in fact the only true, species of Sarsaparilla.

The proprietors, during the many years they have been engaged in preparing it, have tried hundreds of experiments upon the human system, and have had the pleasure of witnessing its happy results in numerous instances; and they were determined not to offer it to the world until they on burning coal. > The following cure, at once so remarkable, so extraordinary as almost to surpass belief, bas, in order to place its truth begond the reach of suspicien or doubt, been sworn to, this 26th day of August, 1842, before his Honor Robert H. Morris, Mayor of the city of New York.

NEW, YORK, August 23, 1842.

Gentlemen,—A tale of misery and woe is mine to tell, and as memory ever constant in the task brings back scenes that have past, I shudder at the picture and almost wonder if it is so. For months stretched upon a bed of suffering and distress, racked by the most excruciating pain, dumb with agony—the only voice that came from my lips the voice of greaning, and my only hope despair. Often and often while others slept in the still hours of night, I have turned my face to the wall and wished to die.

Although I stood on the brink of eternity and the thread

of life was nearly severed, yet I still breathed on, the lamp held out to burn; I little thought it would be ever trimmed again, and only hoped that death would swallow up the flame. My sickness was first broughton by my imprudently exposing myself to a strong current of air while over heated, which caused a sudden check of perspiration. My complaint at first seemed light and hardly worth while to call a physician; but I soon began to grow worse, and a physician was called, who prescribed some pills containing a powerful preparation of mercury, to be followed by sarsaparilla root and lignum vitæ made into a tea, which I continue ed using for several months without intermission. Soon after taking the mercury I began to feel its poisonous influence. My whole glandular system became affected, also the bones, joints and muscles; lumps formed upon the skin nearly as big as an egg accompaned with intense burning heat, which kept swelling until they broke, and discharged matter and blood. These continued to increase until they covered my whole body. But this was only the beginning of my afflictions; now commenced those torturing pains termed chronic rheumatism. Attimes it seemed as if I was stretched upon a rack and all my limbs were being torn from each other; at others as if sharp knives were piercing me at every point. The muscles of my legs seemed, tied in knots and were as hard as a bone. My distress was now so great that my groans at night disturbed the whole house ed using for several months without intermission. Soon of great that my groans at night disturbed the whole house and also some of the families in the adjacent buildings. I had not slept a night since the early part of December last: the only sleep I obtained was a few hours during the middle of only sleep I obtained was a few hours during the middle of the day pillowed up in a chair, and the eruption had also fearfully increased. My face was completely covered with an extending sore. I had now shrank to a mere skeleton—the skin and flesh were so diseased around my thighs that the bones nearly protruded, and the physicians pronounced my case beyond the reach of mesticine. Oh how I wished that I might die. From my long and protracted illness we had become much reduced in circumstances. A short time since while looking in the papers, I chanced to see your Sarsaparilla advertised, accompanied with a certificate from Mr. Burdock, of a most extraordinary cure made by its use. The case in some respects resembled my own, and I found The case in some respects resembled my own, and I found that lingering hope still clung to life. It seemed like a whisper from heaven. The second day after I commenced whisper from heaven. The second day after I commenced taking it I felt the pain much easier and went to sleep. I had not slept like this before for months. By the time I had used one bottle, the pain had nearly left, the eruption was also much better. I now felt a strange hope gathering in my breast that I should live! perhaps be cured. No; this could not be. I dared not believe it. I sent and got another bottle, continuing to improve rapidly, and still another, and I—I a few days since a miserable, suffering, dying man, was almost well. Two weeks from the day I took the first dose I was out, and walked nearly three miles without even the almost well. I we week from the day I look the first dose I was out, and walked nearly three miles without even the assistance of a cane. And now, gentlemen—yes, now, I am well! and have testified before my God upon His sacred Word, that all might believe this statement for it is true, true. Oh how lamely these cold words describe those feararranged. The shortest and best methods will be explained and a thorough practical knowledge of the subject acquired. "Messrs. Sands—Gentlemen: Under a feeling sense of gratitude inherent to us all when suddenly relieved from suffering and disease. I now, as an act of justice the to you, and with a view of relieving the afflicted, make known to disc with the inestimable benefit I have received from the use of your Sarsapardia. In the year 1832 I sailed from England in a vessel bound for Quebec, and while on the assays for discourse I the issues which after convent to England in a vesset bound for Quebec, and white on the passage first discovered the disease which after proved to be a sore affliction; and truly I can say, from the crown of my head to the sole of my foot there was no soundness in me.' From the time first mentioned down ustil the present, a period of more than ten years. I have suffered all that human nature was capable of bearing. I have been under the care of the most distinguished physicians, both in this country and in England, visited Bath, Cheltenham, Bristol and Gioucester, tried various specifics, among others a large quantity of Swaim's Panacea, used sulphur baths, &c. &c. As a last resort I was induced to wrap my self-in a &c. &c. As a last resort I was induced to wrap myself in a tar ointment, keep myself scaluded, shunned by all, myself also shunning. I was induced to believe my case a hope-

less one.

In August last, by the advice of friends, I went to the New-York City Hospital, but was there told that my case was incurable. The disease now enveloped my whole body, rendering me almost helpless; the skin thickened and cracked, and blood and matter ran, and life itself became almost a burden. A few weeks since I was induced to use your Sarsaparilla by hearing it so highly recommended, having spen near \$3.000 without obtaining but little relief. After using it a short time I found myself better, and now, by using six or eight bottles, costing me less than ten dollars, I am well. Y's, I certify and declare to the world, that after spending near \$3.000 in traveling and doctoring, and suffering more than can be told, I was perfectly curred by using your invaluable preparation of Sarsaparilla; curred by using your invaluable preparation of Sarsaparilla; and I now recommend it to all similarly afflicted. Those wishing to know farther particulars will find me at my residence, No. 27 Worren-street. New York, where I shall be happy to communicate any thing in relation to the above

"Messra. Sands: Gentlemen—Owing to you a debt which money cannot pay, I am induced to make a public acknowledgement of the benefit I have derived from your (to me) invaluable preparation of Sarsaparilla. I was sorely affected with a terrible scrofulous disease, hereditary in our family, which commenced on my neck, and, continuing to spread, soon reached my ears, running into my head, and extended all over my face, neck, arms, and lower extremiextended all over my face, neck, arms, and lower extremities. I became a disgusting object to look upon. At times
my distress was so great that I was unable to sleep or lay
down, and the disease extending into my ears, seriously alfected my bearing. My face was one continuous sore, from
which a discharge of matter and water kept constantly
oozing out. People avoided me, snoposing I had the small
pox, or some other infectious disease, and I was consequent
the best medical advice, and tried different plans of treatment the disease to grow worse, until I gave up in despair. ment, the disease to grow worse, until I gave up in despair. Fortunately for me, I chanced to fall in with a lady on board a railroad car while traveling for my health, who informed me that her son was at one time in as bad a condition as was, and that by using your Sarsaparilla he was speedily cured. I immediately procured the article and commenced using it, and now, after having used less than six bottles, I am well and able to attend to my business. I send you this statement as an act of justice, only hoping it may induce the afflicted to make use of the right medicine, and thereby save them much suffering and expense. Those wishing to learn further particulars concerning my case will find me at 207 Greenwich street, where it will afford me great pleasure to communicate anything in relation to the above.

I am, with gratitude, yours, &c.
